

SP Devices wins Metro Tech Challenge

SP Devices was presented as the winner of Metro Tech Challenge at the national incubator and science park conference the 1st of April 2008 in Stockholm. Metro Tech Challenge is arranged by the newspaper Metro Teknik and the organization SiSP, Swedish Incubators and Science Parks.

The entries were judged by a panel consisting of independent experts and representatives of Metro Teknik and SiSP and the jury was led by United States Ambassador to Sweden, Michael Wood. The following criteria were specifically judged by the jury:

- Being a role model regarding successful entrepreneurship
- Showed a substantial positive trend (such as: organization, technique, product or market).
- International market potential.
- Potential to generate significant profit to the owners.

Ola Jacobsen, Metro Teknik's representative in the jury says that: "Trailblazing technology, solid finances and an entrepreneur with fire in his belly all combined to earn SP Devices the award winner of the 2008 Metro Tech Challenge."

"Winning Metro Tech Challenge means a lot for staff confidence. Last year we were named Linköping's leading rookie company, which gave the staff a bit more go," says CEO Jonas Nilsson.
